-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE _____ MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. Claims 1-12 are pending in the application, claims 9-12 are withdrawn from consideration.

Election/Restrictions

2. Applicant's election without traverse of Group I, claims 1-8, in the reply filed on August 9, 2005 is acknowledged.
3. Claims 9-12 withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on August 9, 2005.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claims 1-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Ueno et al. (U.S. Patent No. 6,440,514).

Ueno discloses an automotive interior trim assembly for an automobile (*col. 1, lines 7-11*) comprising a substrate member forming at least part of a structural support of the trim assembly and including at least one target area (*figure 3*) and is deemed to provide a soft feel to

Art Unit: 1772

the trim assembly, a plurality of apertures (*col. 5, line 4*) from in the substrate member within the target area and a flexible skin disposed directly over and contacting the substrate member, at least proximate the target area (*col. 5, lines 13-20 and figure 3*). The apertures are formed through the substrate and form generally honeycomb pattern, blind holes and slots (*col. 5, lines 4-8*). The skin is vinyl and the apertures are at least partially filled with a material of the skin (*col. 5, lines 20-30*).

The limitation “said substrate member is formed from an injection moldable polymer” is a method limitation and does not determine the patentability of the product, unless the process produces unexpected results. The method of forming the product is not germane to the issue of patentability of the product itself, unless Applicant presents evidence from which the Examiner could reasonably conclude that the claimed product differs in kind from those of the prior art. MPEP 2113.
